GYPSINE.

Won't rub off!!

Neither will Gypsine!

Q. What is Gypsine?

A. Gypsine is a permanent and everlasting wall finish, entirely different from all Kalsomine preparations.

Q. How is it more durable than Kalsomines?

A. It is made from a Gypsum and cement base and grows hard on the wall with age.

Q. How about kalsomines?

A. They are but temporary, softening after a short time and have to be washed and scraped off. In fact so ill any wall to which they are applied, as they rub and scale.

Q. Will not Gypsine rub and scale off?

A. No, when originally applied to a clean wall it is everlasting and can be recoated to change tints, or when necessary.

Q. Is Gypsine injurious to the health?

A. Unlike all poisonous wall paper held on with vegetable paste or whitening and glue kalsomine, it is recommended by the leading physicians and sanitarians everywhere.

Q. Can anything but plain wall tinting be done with Gypsine?

A. Any kind of frescoing or relief decorating can be done with it.

Q. Where can I purchase it?

A. From your local paint dealer.

Q. How can I learn more about Gypsine?

A. Ask your dealer or write for copy of GYPSINE ADVOCATE and sample circular.

American Philatelic Society

Expert Committee Report

Members of the American Philatelic Expertizing Service have examined the item submitted and it is their opinion that it is:

Russia Propaganda postal card, by Viktor Deni, unused, genuine in all

Propaganda postal card by **Viktor Deni**, design relates to the 1928 Kellogg Pact, this card would imply that the U.S. was still engaged \$195 in a race war against African Americans, severed head on the top
