SAL HEPATICA.

—We invite the attention of the Medical Profession to a careful consideration of the merits of SAL HEPATICA in the URIC ACID DIATHESIS, in CONSTIPATION, and to its highly important property of cleansing the entire alimentary tract, thereby preventing the development of conditions arising from indiscretion in eating and drinking, and the absorption of irritating toxins.

This preparation is an agreeable effervescent saline laxative and uric acid solvent and has rapidly gained the favor of physicians generally. It is a scientific combination of lithia and sodium phosphate with the laxative salts similar to those found in the most famous European bitter or purgative waters. The action of the salts held in solution in the "Bitter Waters" is too well known to demand specific elucidation, but their remedial value is considerably enhanced by the addition of lithia and sodium phosphate.

SAL HEPATICA can be employed as a laxative and eliminant of irritating toxins with safety and satisfaction in inflammatory conditions of the bowels, and is worthy of a prominent place in the diarrheas of infancy and childhood, and in "summer complaints" which arise from fermentative and putrefactive causes. It is less obnoxious to the organism than sodium phosphate alone, or other saline laxatives, and is more readily eliminated by the excretories and emunctories.

SAL HEPATICA is an ideal laxative for all ages and conditions. It is not in the least depressing, but on the contrary is a physiological tonic; its use does not establish toleration leading to increased dosage; and its withdrawal, unlike many other agents, does not leave the bowels more constipated than at the beginning. It is a safe laxative during pregnancy and lactation or in the presence of anæmic chlorosis.

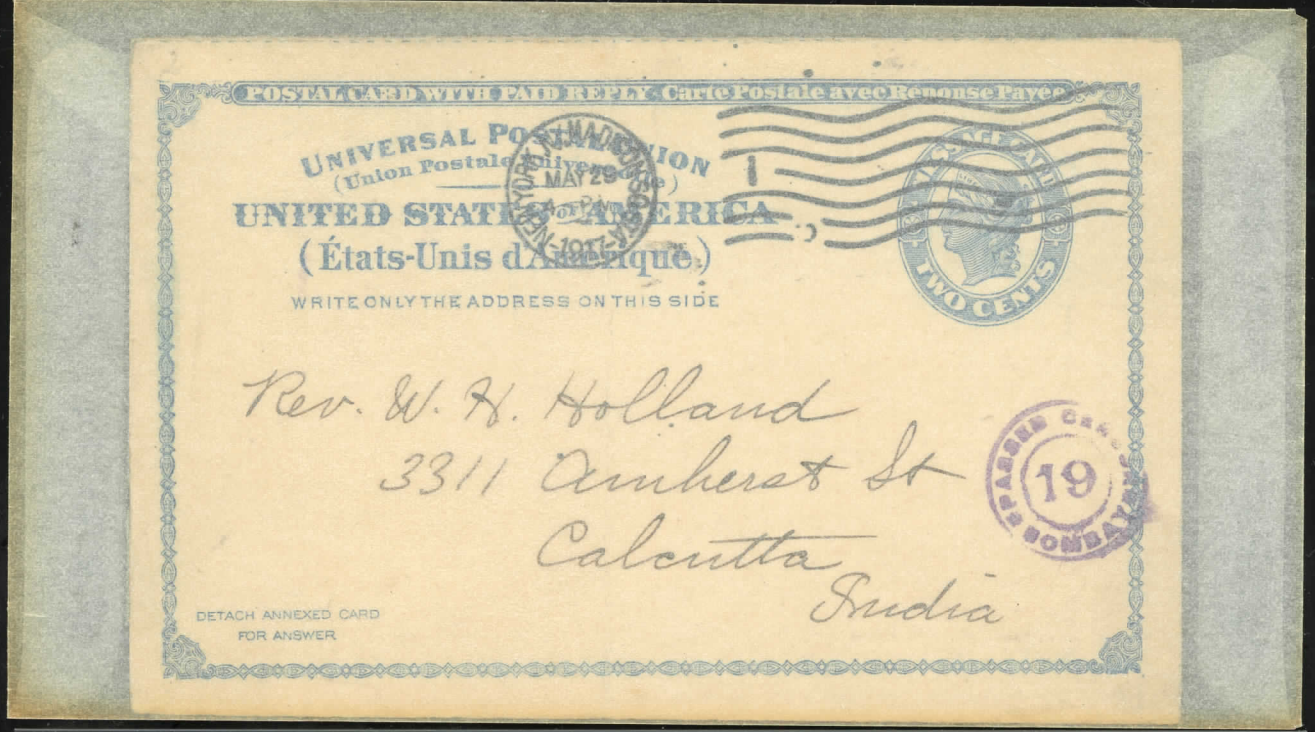

SAL HEPATICA is especially indicated in the Uric Acid diathesis, such as **Rheumatism, Gout,** and True Lithæmia. In these affections it is highly beneficial, usually affording prompt relief. It is very effective in limiting and reducing the amount of uric acid formed within the circulation and excreted by the kidneys, and is very freely absorbed and taken into the blood and as rapidly eliminated by the excretory ducts or organs as is readily demonstrated by its presence, after a brief course thereof in perspiration and urine.

We beg to suggest, Doctor, that you give Sal Hepatica a personal test, either as a saline laxative or possibly as an anti-rheumatic remedy. We find so many physicians are using Sal Hepatica themselves that it is the very best way of proving its merits to the medical profession. As a simple laxative it will be found preferable to citrate of magnesia or seidlitz powders, especially when following the administration of calomel or other forms of mercury.

INTERNATIONAL REPLY CARDS USED ABROAD

Demand for these cards was very limited; although they were issued Mar. 18, 1924, the earliest reported date of use is Mar. 23, 1925. A 3¢ international card was issued Feb. 1, 1926 in response to a new rate, so that cards of the 1924 issue properly used at the 2¢ rate are decidedly scarce.
